What's (and who's) emerging this spring at **Performance Mix**, Tuesday-Sunday, June 10-15?

Mix it up with the likes of **Celeste Hastings/The Butoh Rockettes** in *Victoria's Shadow*, "an over the top abstract otherworldly murder/soap/mystery...incorporating chorus lines, the butoh dance medium with layers of social/political commentary and ideas of reincarnation." Or maybe **Magdalene San Millan and Chelsea Murphy**, billed as "two crazy motherfuckers trying to change the modern dance world right before your very eyes." Or how about **Victoria Libertore** who, once upon a time, did some serious research into the life and times of a female serial killer?

So far, none of these folks sound tame. And there's more: **Christal Brown, Dana Michel, Emily Faulkner, Rebecca Patek, Antonio Ramos....**
